Model
MBL74L

Features:

- Sizes available 66", 74" (low profile), 74" , & 84"
- Can convert to 3-point category I & II hitch for 540 RPM tractor mount in minutes.
- 4 bolt greaseable bearing housings at each end of auger which give extra rigidity.
- Auger flighting thickness is 5/16" is among the heaviest in the industry
- #60 Roller chain
- Bolt-on replaceable cutting edge
- Adjustable & replaceable skid shoes
- Powder coat painted—means less chipping, scratching, less chance for rust
- Deflector options: both hydraulic and manual available.
- Chute options: both hydraulic and electric chute rotation available.

The right motor for your machine

Haugen Snow Blower fan diameters range from 17" to 21". The fan is the limiting factor in blowing snow with any snowblower because it takes more horsepower to run than the auger. The size of fan on the Haugen Snowblower is designed to maximize throwing distance while maintaining high capacity when matched with the proper sized hydraulic motor.

Choice of 6 motor sizes to fit skid steers (ranging from 10-40 gpm) maximizes tip speed on the fan to throw snow farther distances.
